Ultrasonic counter-current extraction technology is a kind of newly dynamic extraction equipment, using ultrasonic physical performance, under the condition of low temperature extraction of effective components from natural plants, its main characteristics is fully ensured continuous working, dynamic counter-current production line, the annual processing capacity is 6000 tons of raw materials, and provide dynamic cycle concentrator in low temperature. Microwave oven, no screen winnowing grinder, metal detectors and other equipment to fully protect active ingredients in plant, which enable the product to have good physical properties. |
HIT-ZHONGAO Biological Engineering Co., Ltd.

HIT-ZHONGAO Biological Engineering Co., Ltd. was registered on June 18, 2013, its registered capital is RMB 30 million yuan and its total investment is up to RMB 150 million yuan. The production factory is located in the No.7 Zhounhi Road, Pingfang District, Harbin, Heilongjiang Province, China. Factory floor area is 35000 square meters with construction area of 40000 square meters. Our company is a modern, high-tech, innovation oriented enterprise, a high-tech biotechnology industry system which includes the natural plant extract, functional food, health food, aerospace food and military food, research and development, production and sales. Our company bases on the modern bio-separation technology of HIT, and import the world advanced biological extraction and processing equipment, bases on the unique plant resources of our country produce a series of products. Our company is dedicated to the research of modern biological separation technology, natural plant extract production, functional food technology development, aerospace food research and development production.

Hebei Xingdian Biotechnology Co., Ltd.

We utilize the international advanced equipments to develop the industry of natural food and ingredients, and integrate the local resource and technological advancement to research the new products continuously. By far we have 3 products series: nutritional oil, functional ingredients, oil emicrocapsules. We complete quality system ceaselessly, striving for providing topping products and service.

HERBLINK BIOTECH CORPORATION

HERBLINK Biotech Co., Ltd., an innovative herbal ingredients manufacturer and reliable supplier, has focus on nutraceuticals, pharmaceuticals and personal care since 1998. Over 19 years herb extract experience. Our company strictly carry on extraction and multichannel two-dimensional chromatographic separation technology, it can maximally keep the completeness of the active substance and improve its purity to the world advanced level. The united extraction technology integrates the advantages of many techniques. Manufacturing techniques such as extraction, concentration, purification and freeze-drying are well combined. This technique can push the production of anthocyanin to its limit. It possesses advantages such as high efficiency, large feeding quantity, continuous production, high purity, low impurity, easy recycling. The freeze-drying technique also provides the access of pharmaceutical to the company. In the high cleaning environment, the freeze-dried anthocyanin displays better water solubility. The new smart phytochemistry production line has been applied in the production in the present phytochemistry enterprise. Under the help of the united extraction technology of Professor Zhenyu Wang in our company and the software technology of HIT Robot Group, we can combine the manufacturing and software and achieve real time monitoring of both online and offline. Some steps of the production can be realized by one button operation. The technology and creation of modern production can be well shown. In addition, under the help of software programming from HIT Robot Group, techniques including intelligence of equipment, one button operation of some equipment and online monitoring have been realized. We have obtained a scientific research team and advanced technologies for all the above.

**Omega 3 acid ethyl esters API, pharmaceutical grade fish oil, has been approved by US FDA.** High quality, strict control of impurities, and cost-effectiveness, we are the leading manufacturer among all producers.
INNOBIO Corporation Limited
E3446  www.innobio.cn  global  Dietary supplement  ISO9001, HACCP, cGMP, CNSAB, HALAL, KOSHER, NON-GMO

INNOBIO, a Chinese company with leading technology, devotes to human nutrition, is a recognized expert in separation, refinement, purification, structure modification, micronapsulation, and bioconversion providing unique value-added natural ingredients and premises. INNOBIO provides specialty ingredients internationally for natural supplements, specialty foods, sports nutrition, specialty beverages, medical foods, and pet products.

Conjugated Linoleic Acid 95%. Conjugated Linoleic Acid TG Powder CWD, Lupin Eskers Powder, β-Carotene 10% Beadlets, Sustained Release BCCA.

INNOBIO has developed techniques that ensure success for encapsulation of a wide variety of materials with different properties. Our diverse product list includes natural carotenoids, a range of natural unabsorbed fatty acids, branched chain amino acids and functional lipid powders. All of our microencapsulated products are guaranteed to be stable, meet solubility criteria, with excellent flow characteristics and provide exceptional organoleptic properties.

Jiangsu Yee Pharmaceutical Co., Ltd
E3006  www.hodisyew.com  USA, EU, Japan, South America, Russia, Belarus, India, Belarus and others.

It was engaged in anti-tumor series product with GMP. The product incl pacitaxel, docetaxel, cabazitaxel, ramotexipl, allipotin, 10-DAB, 1ide chain etc. Our pacitaxel was listed on U.S. FDA, the DMR registration number is 25759, and also registered in South Korea, India, Belarus and other countries.

paclitaxel, docetaxel, cabazitaxel, allipotin, 10-DAB
We have a very high content 10-DAB taxus source planted by ourselves. The content is 3 times as that from European source, which will be a revolutionary in anticancer product - paclitaxel and docetaxel market.

Jiaxing Hengjie Biopharmaceutical Co., Ltd
E4535  www.chondroitinpowd er.com  USA, EU, Japan, South America, Russia, Ukraine, Southeast Asia  Dietary Supplements for joint health

Jiaxing Hengjie Biopharmaceutical Co., Ltd. is a NSF-GMP verified manufacturer and supplier of joint health ingredients including Chondroitin Sulfate, Glucosamine, Hyaluronic acid, chicken collagen, fish collagen and shark cartilage powder.

The main application of our products are for production of dietary supplements that is intended to use for joint health. The most competitive product of our company is chondroitin sulfate for which we have the DMF Documentation in CTD format. Our company is located very close to Shanghai, you are very welcome to visit our company.

Chondroitin Sulfate, Glucosamine, Chicken Collagen type II, Shark Cartilage Powder, Fish Collagen
Chicken collagen type II is another competitive product of our company,we produce and supply chicken collagen with good quality and competitive price.

Jilin Baili Biotechnology Co., Ltd
E4F29  www.bailibiochem.com  Europe, America, Australia, New Zealand, Northeast Asia, etc.

Food, health care product, cosmetics  ISO9001, GMP, HACCP, ISO22000, KOSHER, HALAL, ECOCERT, NOP, JAS

As a key leading enterprise in agricultural industrialization, Jilin Baili Biotechnology Co., Ltd. covers a floor area of 23000 square meters, and has established GMP standard factory. It focuses on the R&D and production of natural nutritional vegetable oils which are indispensable for human health. The company adopts advanced techniques and management system to guarantee high quality products and services. Sixteen years of experience in manufacturing and exporting makes Baili a modern and high-tech enterprise. It wisely integrates conservativeness with ambitiousness in raw material cultivation and collection, product R&D, quality inspection and business development.

Evening Primrose Oil, Flaxseed Oil, Flaxseed Oil (Linseed Oil), Pumpkin Seed Oil, Perilla Seed Oil
Evening primrose originates from Mexico and Central America, now grows abundantly in northeast of China. Evening primrose oil contains large amounts of ω-6 series of unsaturated fatty acid, which, as medical research shows, has remarkable effects on balancing female endocrine hormones, decreasing blood lipid, inhibiting platelet aggregation, lowering blood pressure and resisting arrhythmia, etc. Its superb efficacy for women's beauty and health makes evening primrose oil the favorite of functional food, pharmaceutical, cosmetics and healthcare industries.

Jilin Zixin Ginseng Sales Co., Ltd
E4C48  www.jilinzixin.com.cn  Vietnam, Taiwan, South Korea, Japan  Plant extract, Food  GMP certification, Food GMP certification, Organic certification

Zixin ginseng sales Co., Ltd, established in 2011, is a wholly owned subsidiary of Jilin Zixin Pharmaceutical Industrial Co. Ltd. The company attaches importance to the research and application of modern business model, and has already owned a variety of sales platforms as flagship store and network store. And carry out the research and sale of extract of plant raw materials such as ginseng extract. Ginseng rough machining, deep processing and finishing products. Main products include: ginseng enzyme, red ginseng donkey-hide gelatin, cakes, honey ginseng, ginseng ears, beverage, ginseng tea and all kinds of high-grade wild ginseng, panax ginseng, moulded red ginseng, etc.

All varieties of ginsenoside, Honey ginseng stick, Ginseng enzyme, The fine red ginseng, High quality raw ginseng
Purple sin pharmaceuticals and ginseng tongue city government, the Beijing genomics institute of Chinese academy of sciences with the help of the core technology, finally realize the refinement, scientific and standardized development of ginseng industry, make high grade, high quality of ginseng products figure.

Junji Biology & Chemistry Co.,Ltd
E3550  www.junjibiochem.com m  U.S., Japan, EU and South east  foods, feeds, textiles, dyestuff, pesticides, advanced materials, automation and micro-electronics etc.

The company has gained certificates of ISO9001-2000, HACCP, FAMI-QS, HALAL & KOSHER and carried out the pre-registration of REACH. In addition to the above, it also got the Chinese product licenses of food additives and feed additives.

Junji Biology & Chemistry Co., Ltd. is built in 2008, situated in Zhanjiang Economic Development Zone, Huanan Province. Currently, it mainly produces Tannic acid, Saponin, Hesperidin, Chlorogenic acid and their derivatives.

Tannic Acid, Gallic Acid, Propyl Galleate, Pyrogallol, 5,4,3-Timethoxy Benzoic Acid
Junji is professional in all kinds of raw materials of nutraceuticals, and provides high purity and good quality products.

LIVERD PHARMA CO. LTD
E3E98  www.liverdpharma.co  America, Canada, Europe, Unrathia and so on.  Pharmaceutical, Healthy Products  GMP, ISO, KOSHER, HALAL, WRITTEN CONFIRATION

LIVERD is Silymarin GMP manufacturer, it has perfect GMP Management System Advanced New Production Equipments. The production ability of Liver is 500Tons per year, which has more than 16years Silymarin Manufacturing Experience. LIVERD has more than 50 kinds of specifications for Silymarin to satisfy different customer's different requirements. LIVERD has its own Planting Base to ensure the traceability of raw materials. Because of the Professionality, So we constantly Focus.Because Honesty, So we always be Trusted.

Silymarin, Milk Thistle Extract, Stilben, Water Soluble Silymarin, Milk Thistle P.E.
For Silymarin, we have nearly 20 years' production experience and complete GMP management system, we have the ability to accept customer personalized customization.

Our key products are Garlic powder & granule, Garlic Extract ( Allicin & Alillin ), Odorless Garlic Oil, Black Garlic, Red Yeast Rice, Gogi Extract, Reishi Mushroom Extract, Garlic Extract, Black Garlic Extract, Red Yeast Rice Extract, Gogi Extract.
**Shaanxi Huike Botanical Development Co., Ltd.**

**Website:** www.hukexs.com

**Location:** Shaanxi, China

**Focus:** Produces and sells high-purity plant extracts and other natural ingredients used in pharmaceutical, dietary supplement, nutritional supplement, cosmetic, and functional food and drink industries.

**Services:** Offers high-quality products with mature technology, high-efficiency work process, and experience in cost control and quality management.

**Certifications:** GMP standard workshop of 2000 square meters, advanced lab of 500 square meters.

**Applications:** Medicine, tobacco, veterinary drug, chemical, etc.

**Ingredients:** Rice bran, flax, perilla, pumpkin seed, borage, etc.

**Products:** Plant extracts, rice bran oil, pumpkin seed oil, perilla oil, evening primrose oil, and flaxseed oil.

**Certifications:** GLYCYRRHIZINATE, DL-MONOMETHYLGLYCYRRHIZINATE, GLYCYRRHIZINATE, DL-METHYLNITRILE.

**Usage:** Medicines, tobacco, veterinary drugs, chemical, etc.

**Advantages:** Fewer solvent residues, clean extraction, and natural ingredients.

**Extraction Methods:** Plant extracts are extracted by water, with no solvent residue.

**Storage:** Long-term stability and low cost.

**Quality Assurance:** Strict quality control and fast delivery.

**Analytical Methods:** High-performance liquid chromatography (HPLC).

**Application:** Nutritional supplement, cosmetic, and functional food and drink.

**Certifications:** GMP, ISO, Kosher, HALAL, HACCP.

**Usage:** Medicine, tobacco, veterinary drugs, chemical, etc.

Coconut powder, Mango powder, Lime powder, Pumpkin powder, Lemon powder As the first domestic factory to produce tropical fruits powder, we emphasize the importance of production development and technological innovation. In response to the browning phenomenon due to the high pectin content and high content of active substances in tropic fruits, we use the low temperature enzymatic hydrolysis technology and microcapsule embedding treatment to ensure that our products keep their original color and flavor. In this innovative process, we have successfully applied for a number of national invention patents (Patent No. CN20141731.8, 201610209644.0 and 201610209445.5).
