

**12<sup>th</sup> IFSEC INDIA Conference**  
**Unraveling the Evolution in Security Tech**  
*Annual International Conference & Exhibition on Security*  
*Pragati Maidan, New Delhi*

**Agenda - Day 1: Wed, 5<sup>th</sup> Dec 2018**

**9.30 - 10.00 – Registration**

**10.00 - 11.00 – Inaugural Session**

- **Welcome Address:** Shri Yogesh Mudras, Managing Director, UBM India Pvt. Ltd.
- **Special Address:** Shri D.R. Karthikeyan, Chairman, Assocham Homeland Security Council
- **Keynote Address:** TBC
- **Guest of Honour Address:** TBC
- **Chief Guest Address:** TBC
- **Vote of Thanks:** **Shri Pankaj Jain**, Group Director, UBM India Pvt. Ltd.

**11.00 - 11.30 – Tea and Networking**

**11.30 -12.00: Keynote: Capt. Raghu Raman**, President – Risk, Security and New Ventures, Reliance Industries Ltd.

**12.00 - 13.00: Corporate Risk Management: Integrating Standards and Best Practices into Operations (panel discussion)**

**Discussion Points**

- ❖ The evolution of security and information threats to corporate organisations requires a complete overhaul of corporate risk management strategies
- ❖ The right corporate risk management strategy not just ensures adequate safety and security for the occupants but also for vital corporate assets.
- ❖ Having the right access control devices to control the flow of visitors as well as the right facility management systems to protect against fire and other natural disasters should be foremost among the list of priorities.

**13.00 - 14.00 – Lunch and Networking**

**14.00-14.30: The Evolving Role of a CSO in Crisis Management and in Ensuring Business Continuity (speaker session)**

**14.30 - 15.30: Partner sessions**

**15.30 - 16.00: Tea and networking**

**16:00 – 17:00: Regulatory Compliance Requirements Related to Corporate Security (panel discussion)**

**Discussion Points**

- ❖ Recent Regulations, Technical Guidelines for Security Within Different Industries
- ❖ Surveillance Trends, Technologies Driving Data Growth and the Impact on Storage Requirements
- ❖ Key Strategies and Right Technologies to Identify Insider Threats to Security

-----**End of Day 1**-----

**Agenda - Day 2: Thur, 6<sup>th</sup> Dec 2018**

**10.00 – 10.30: Keynote: Shri M.S. Upadhye**, IPS, Chief Security Commissioner, Delhi Metro Rail Corporation

**10.30 - 11.00: Workshop:** Industry Best Practices in the Manufacture of Security Products by Bureau of Indian Standards

**11.00 – 11.30: Tea and Networking**

**11.30 - 12.00: Keynote: Technology-Enabled Disruptions, “Emerging Paradigms in Security Architecture”**

- Lt. Gen. Sudhir Sharma, PVSM, AVSM, YSM, VSM, Former Quartermaster General, Indian Army

**12.00 – 13.00: How AI & IoT Add Value to Video Surveillance Systems (panel discussion)**

**Discussion Points**

- ❖ The world is increasingly moving towards an era of Artificial Intelligence and IoT in security and surveillance systems. Deep Learning takes it a step further with by enabling even more powerful analytics to recognise suspicious activity without much human supervision.
- ❖ The benefits of AI for face recognition and image classification make it extremely valuable in the field of security as facial recognition allows for easy identification of suspects, vehicle detection, and also behaviour analysis.
- ❖ With connected devices all around us and the need to make security systems more intelligent in order to ease challenges in managing them, IoT has been in greater focus than ever before.

**13.00 - 14.00: Lunch**

**14.00 – 14.30: Keynote: TBC**

**14.30 - 15.00: Partner sessions**

**15.00 - 15.30: The Threat of Cyber Attacks on Security & Surveillance Systems (speaker session)**

**15.30 – 16.00: Tea and networking**

**16.00 - 17.00: How Drones and Unmanned Aerial Vehicles Can be Effectively Used to Enforce Homeland Security (panel discussion)**

### **Discussion Points**

- ❖ India shares 15,106.7 km of its boundary with seven nations— Nepal, Bhutan, Afghanistan, Pakistan, China, Myanmar and Bangladesh. Managing such diverse land borders is a complex task and these land borders run through different terrains.
- ❖ The western border in particular is an eternal hotbed with terrorists, drug-traffickers, smugglers and human trafficking gangs always on the lookout for opportunities to sneak past the BSF and enter our territory.
- ❖ Unmanned aerial vehicles and drones can play an effective role in keeping an eye on such intruders and also help reduce casualties among our security forces patrolling the borders.

-----**End of Conference**-----
