

Access controlled... Future secured.

BLG 7x

RISING FENCED BARRIERS

AS AUTOMATIC
SYSTEMS
VER GROUP

VEHICLE

SECURITY & SAFETY

- Complete closure of a secured site
- Reinforced housing and chain link fence to dissuade fraud attempts
- Access restricted to both pedestrians and vehicles
- Operating time that enables to control the access of each vehicle
- Mechanical locking of the barriers in open and closed positions

PERFORMANCE

- Designed for intensive use (more than 1,000 passages a day)
- Equal performance in all climatic conditions (wind, snow, frost...)
- Faster than a sliding gate system
- High reliability

RISEING FENCED BARRIERS

Fenced barriers are actual rising fences which propose a robust alternative to sliding gates, all while offering significant advantages in terms of operating speed and footprint.

BLG 76

- Length: upon request (max. 5.5 m - 18')
- Height: 1.9 m (6.2')
- Opening time: 12 sec.

BLG 77 H: high version

- Length: 5.1 m (16.7')
- Height: 3 m (10')
- Opening time: 7 to 10 sec.

BLG 77 L: wide version

- Length: 6.4 m (21')
- Height: 1.8 m (6')
- Opening time: 7 to 10 sec.

BLG 77 M: medium version

- Length: 5.1 m (16.7')
- Height: 1.8 m (6')
- Opening time: 7 to 10 sec.

BENEFITS

- Offer both security and high vehicle flow
- Prevent intrusion of pedestrians and vehicles
- Efficient control of vehicle access
- Closing of wide openings, with a small footprint
- Low installation and maintenance costs

MARKETS

- Perimeter access
Industrial areas, logistics
- Sensitive sites
Port (ISPS) and airport premises, military bases, strategic industries...
