

NEW NEFF WINE CABINETS AND VENTING HOBS AT KBB BIRMINGHAM 2020

March 2020: NEFF is unveiling a range of new appliances at the KBB Birmingham 2020 show (NEC, 1-4 March 2020). NEFF (stand X130) is exhibiting alongside its sister brands, Bosch and Siemens, in a combined exhibition area of over 500 sq m in hall 17.

New for 2020 in **venting hobs** are the 80cm-wide **N 90 T58TL6EN2** and 70cm-wide **N 70 T47TD7BN2** models. Both of the new venting hobs boast a re-designed air inlet. It is slimmed down, streamlined and sits fully flush to the surface, creating an extended usable area of induction hob.

A notable addition for the **N 90 T58TL6EN2** Flex Induction hob is that it will be possible to monitor it via the Home Connect app. This will include push notifications when the filter needs changing and a direct link to buy a replacement. Features also include Climate Control, that senses the cooking steam and odours and automatically sets the most effective extraction level, and a Frying Sensor to stop food burning. Meanwhile, the **N 70 T47TD7BN2** is the first 70cm venting hob that is suitable for installation in standard 60cm furniture.

To the NEFF **wine cabinet** offering, two new models are added. Firstly, for compact wine collections, the **N70 KU9202HG0G** is an undercounter model that is just 30cm wide. With space for 21 bottles within one temperature zone, it has bamboo shelves and a stainless steel bar handle. The larger **N70 KU9213HG0G** is a 60cm-wide cabinet with a 43-bottle capacity. Two temperature zones can be independently set between 5°C and 20°C. The new cabinets are due to launch in the autumn.

Commenting on the new products, Sue Flowers, NEFF Group Marketing Manager, said: "We're looking forward to exhibiting our new range of venting hobs and wine cabinets at KBB Birmingham. The new venting hobs come with a range of features, including a re-designed air inlet and a Frying Sensor, while the new wine cabinets offer wider variety for compact and larger wine collections."

About NEFF

NEFF GmbH develops and produces household appliances for people who have a passion for cooking and value functionality, design and ease of operation. Founded in Bretten in the German state of Baden-Württemberg in 1877, the company is now one of the leading manufacturers of built-in household appliances in Europe. Its product portfolio comprises all modern household appliances, including ovens, hobs, extractor hoods, refrigerators, freezers, dishwashers and full automatic coffee machines. People take centre stage in the kitchen.

That has been NEFF's philosophy for more than 135 years. With inspiring ideas, the brand continuously sets new standards, particularly in the area of its core competencies of cooking and baking. Examples include the CircoTherm® hot air system, the smooth-running ComfortFlex® fully extendable rail system, the only fully retractable oven door Slide&Hide® and the unique Point&Twist magnetic dial operation on our hobs. Since 1982, NEFF has been part of BSH Home Appliances Ltd. Further information is available at www.neff-home.com/uk/
