

The Hottest Innovations at Pharmapack Europe 2018

Spotlight on Innovation Gallery & Pharmapack Awards 2018

Independent jury board of **Pharmapack Awards** has selected the top 10 innovations from 2018 exhibitors new products showcase (**Innovation Gallery**) among whom the top 3 won the prize of Pharmapack Awards, alongside 3 winners from pharmaceutical and veterinary companies in “Health Product” category (commercialised medicine product with innovative packaging solution)

	Pharmapack Awards 2018 Winners	Product	Type
Health Product Category (Commercialised product)	GSK Consumer Health	Voltaren “No Mess” applicator	OTC Packaging
	Virbac	“All in one” Contactless Multidose Delivery Cap	Veterinary Packaging
	UCB Pharma	CIMZIA® Pack of 2 AutoClicks® Prefilled Pens	Secondary Packaging
Exhibitor Category (Non Commercialised product)	Biocorp	ONEJET	Auto-injector
	West Pharmaceutical Services	SelfDose™ Patient-Controlled Injector	Auto-injector
	sfm medical devices GmbH	Nextaro	Reconstitution system of lyophilized pharmaceutical components

Top 10 Innovations from 2018

Exhibitors Innovation Gallery

**Top 10
Innovator**

Rank	Pharmapack Awards 2018 Winners	Product	Type
1	BIOCORP	ONEJET	Auto-Injector
2	West Pharmaceutical Services, Inc.	SelfDose™ Patient-Controlled Injector	Auto-Injector
3	sfm medical devices GmbH	Nextaro	Reconstitution system of lyophilized pharmaceutical components
4	Perlen Converting AG	PERLAMED-BLISTair	Single use inhaler
5	Nemera	e-Advancia®	Nasal spray electronic device
6	Gerresheimer	Gx InnoSafe®	Safety Syringes
7	Schott AG	iQ™. The Global RTU Standard	Ready-to-use (RTU) filling concepts
8	Baswen Inc.	Pharma Adherence IoT Pack	Solid dosage IoT packaging
9	Cambridge Design Partnership	diialog™ - user insights research toolkit	User Insight service
10	PLASTIFRANCE	JUSTADOSE & JUST'ADOSE+	Connected liquid dosage pipette

Voltaren “No Mess” applicator
from **GSK Consumer Health**
co-developed with **Neopac**
and **Nypro Healthcare**

An applicator for GSK’s anti-inflammatory OTC analgesic designed to avoid overdosing problems, offering consumers a simple and hygienic way of applying gel directly to the point of pain, while keeping their hands clean.

OTC Packaging
Winner

***“All in One” Contactless
Multidose Delivery Cap***
from **Virbac**, co-developed
with **Biocorp**

“All in one” Contactless Multidose Delivery Cap is a unique and very innovative packaging device, and the only “all in one” solution on the market. It offers a complete, safe and easy solution in the respect of good medical practices, and thus allows the best application of liquid products by users.

Veterinary Packaging
Winner

**CIMZIA® Pack of 2
AutoClicks® Prefilled Pens**
from **UCB Pharma,**
co-developed with **Rondo AG**

A packaging system puts rheumatoid arthritis patients and others with hand dexterity issues at the forefront. The pen has a button-free delivery system and a wide non-slip grip, with new elements that help to improve patient compliance including a large viewing window and a clicking sound at the start and end of a full dose injection.

Secondary Packaging
Winner

ONEJET by **BIOCORP**

The first motor driven disposable auto injector, compatible with standard primary containers (PFS from 1 ml to 2.25 ml), designed to easily deliver high viscosity products.

Jury Distinction
"Patient Safety & Convenience"
Winner

SelfDose™ **Patient-Controlled Injector** by **West Pharmaceutical Services**

A simple two-step operation, designed to make administration far easier for patients with dexterity challenges. The patient only has to remove the cap and press against the skin to deliver a subcutaneous injection, and audible and visual end-of-dose indicators confirm successful administration of a prescribed dose

Jury Distinction
"Ease of use & Patient Compliance"
Winner

Nextaro by **sfm medical devices GmbH**

The quality benchmark for reconstitution of lyophilized pharmaceutical components. The product works using a patented screw system and optimises handling through the use of two plastic components. This construction means it is especially suitable for people with physical disabilities

Jury Distinction
"Patient Centricity & Customization"
Winner

PERLAMED™ BLISTair by **Perlen Packaging**

Single use inhaler on a thermoformed blister basis, completely manufactured on one blister machine, primary and secondary packaging. Contains an air intake, mouth piece, powder enclosure & opening system. Allows patients to always have a new device.

Top 10 Innovator

e-Advancia® by **Nemera**

A new generation nasal spray device developed for multi-dose nasal spray applications, high performance pump combined with a reusable electronic add-on to improve patient compliance

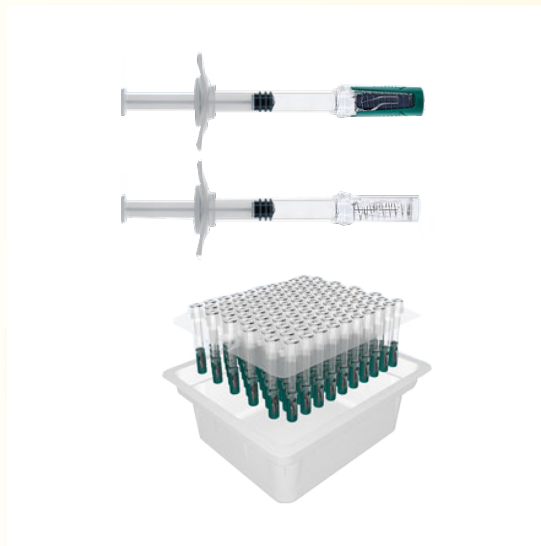

**Top 10
Innovator**

Gx® InnoSafe™ by Gerresheimer

Integrated and passive safety system for prevention of needle stick injuries.
The safety system simplifies the production process of pharmaceutical companies since existing filling lines can be used.

Top 10 Innovator

iQ™ platform by Schott

iQ™ is a holistic platform that standardises ready-to-use (RTU) syringes, vials and cartridges within a single tub format to run on one filling line. Pharma manufacturers can thus fill various drug/container configurations on the same line reducing changeover times.

**Top 10
Innovator**

Pharma Adherence IoT Pack by Baswen

Pharma Adherence IoT Data Pack provides a unique solution to improve patient adherence and compliance using integration of unit dosing and IoT enhanced data capturing technology in patient-side medication package.

Top 10 Innovator

***diialog™ user insights
research toolkit***
by **Cambridge Design
Partnership**

A new user research service covertly captures patient behaviour, supplementing established methods and providing additional proof of in-home user behaviour. It comprises miniature logging pucks that can be hidden within drug delivery devices.

**Top 10
Innovator**

JUSTADOSE & JUST'ADOSE+ by **PLASTIFRANCE**

JUST'ADOSE® pipette enables doses to be premeasured. Using the included sliding scale on the side of the pipette, you can choose the amount of medication to be given. The pipette will then automatically limit the amount of medication.

The JUST'ADOSER pipette also enables treatment to be monitored using a dedicated smartphone app. The pipette is equipped with a QR code that allows parents to open an app on their smartphone.
